Information and Communication Technology

Fifth primary

First term
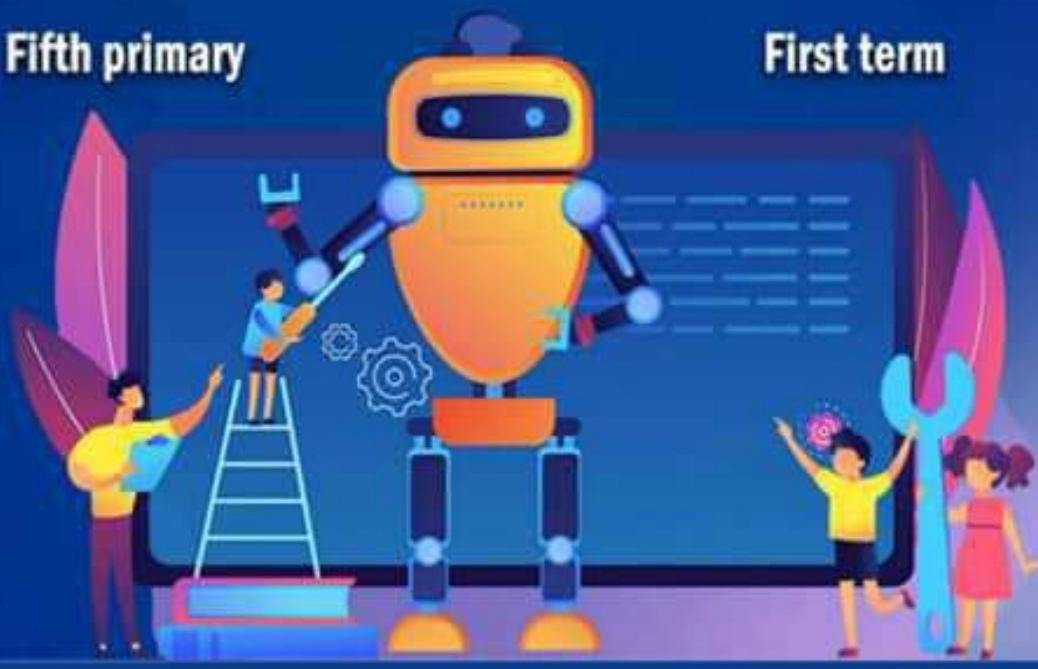

2022-2023

Theme1

Role of Information and Communication Technology (ICT) in our lives

Lesson 1 Explorer in Action

Lesson 2 Computer accessories

Lesson 3 Networks

Lesson 4 Digital communication tools

Lesson 5 Internet connection problems and solutions

Lesson 6 Digital file management

Lesson 7 Information search strategies

Lesson 8 Sharing information

SPOTLIGHT on Theme 1

In this theme, you will learn about how different computer networks communicate,
how to troubleshoot common computer hardware and software problems,
and how to use ICT tools effectively and efficiently. You will also create a spreadsheet to share information that you've found while researching online, making use of what you have learned.

Theme1 :Role of Information and Communication Technology (ICT) in our lives

Lesson 1 Explorer in Action

Lesson 2 Computer accessories

Lesson 3 Networks

Lesson 4 Digital communication tools

Lesson 5 Internet connection problems and solutions

Lesson 6 Digital file management

Lesson 7 Information search strategies

Lesson 8 Sharing information

Fred Hiebert is:

1- An archaeologist and explorer.

2-An Explorer in Residence for the National Geographic Society.

3-As an archaeologist,

✓ he studies the past by excavating,

✓ observing,

✓ and writing about objects and sites.

✓ As part of his role, Mr. Hiebert is also a mentor who guides his students and colleagues around the world.
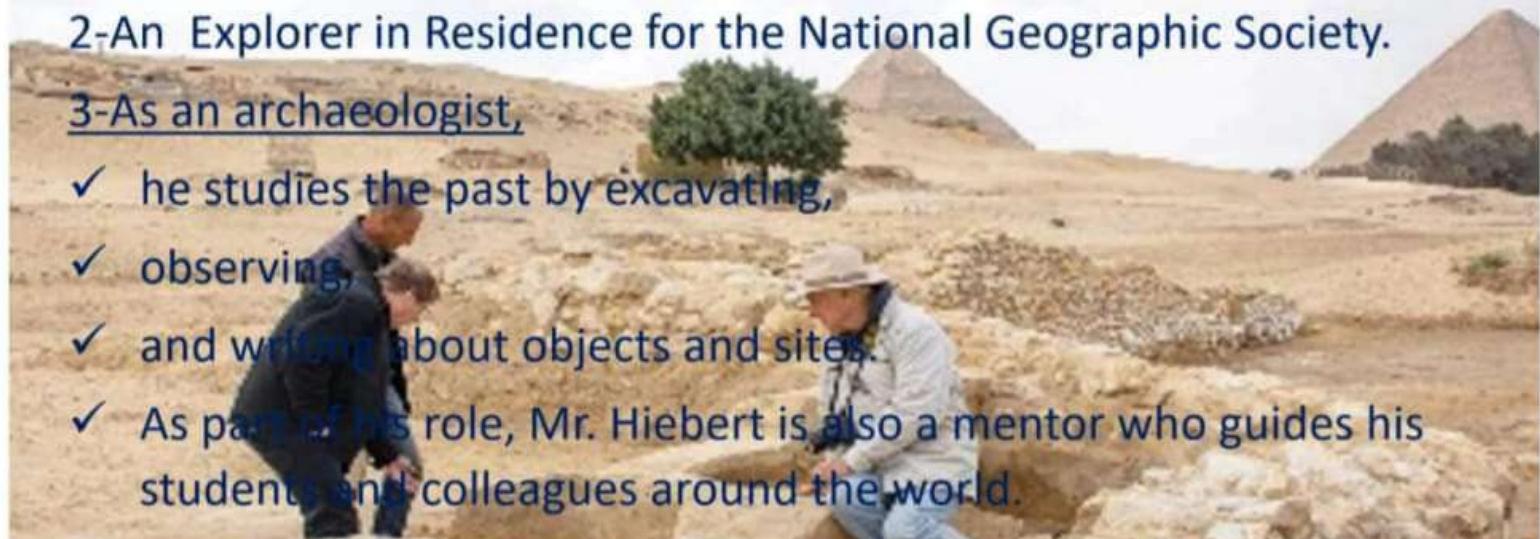

In his daily work, Mr. Hiebert uses:

1-The Word processor program (Word) to write reports,

2-The Excel spreadsheet program to prepare and show graphs,

3-The PowerPoint presentation program to present the results of his research to his team.

4-Printed letters and e-mails when he wants to communicate more formally, or he hands over documents in person.

Virtual meetings

As part of his role, Mr. Hiebert is also a mentor who guides his students and colleagues around the world.

Mr. Hiebert generally prefers to communicate with people through face-to-face, in-person meetings.

At times, this is not possible because he is away on an expedition, or the people he is meeting with are in different countries

In such cases, Mr. Hiebert holds **virtual meetings** using platforms like **Zoom** and **WhatsApp**.

These meetings must be scheduled at a time that is suitable for everyone.
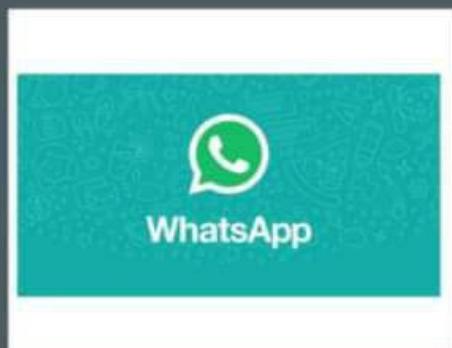

Exercise 1:

Complete: -

1-Fred Hebert used some ICT tools in his daily work, such as
Word prossing , Excell spreed sheet , Power point presentation .and E mail .

2- Word prossing . is a program used to write reports.

3- Excell spreed sheet is a program used to create graphs.

4- Power point presentation is a program used to prepare presentations.

5-Dr. Hebert held virtual meetings using platforms like . Zoom And.. Whats App

Exercise 1:

Put (√) or (×): -

1-Dr. Hebert doesn't use any ICT tools in his day-to-day life.   (X)

2-Dr. Hebert uses platforms like Zoom and WhatsApp to communicate with people.   (√)

3-PowerPoint is a program used for writing reports.   (X)

4-Dr. Hebert uses word and Excel programs to communicate   formally.   (X)

5- Dr. Hebert guided his students and colleagues all around the world.   (√)

6-ICT tools made our day-to-day life harder.   (X)

7-Word is a program for spreadsheets.

(X)

Like Mr. Hiebert, you can use ICT tools to share ideas. However, your computer's hardware must be working properly.

Router: a device that connects a computer the internet via Wi-Fi or ethernet

ethernet cable: a cable that connects a computer or laptop to a router.

cable : a long connector that transmits data or power between devices.

ethernet port connects an ethernet cable; ethernet is more stable and faster than Wi-Fi

Flash Memory :

is an electronic non-volatile computer memory storage medium that can be electrically erased and reprogrammed.

External Hard Drive:

Like Hard disk drive but much faster.

HDMI (high-definition multimedia interface):

a cable that transmits audio and video from/ to devices

Units of measurement:

bit: the smallest unit of data

byte: 1 byte = 8 bits = 1 character; the word 'cat' has three letters and would need three bytes.

	byte							bit
C =	0	1	0	0	0	0	1	1
A =	0	1	0	0	0	0	0	1
T =	0	1	0	1	0	1	0	0
c =	0	1	1	0	0	0	1	1
a =	0	1	1	0	0	0	0	1
t =	0	1	1	1	0	1	0	0

Byte = 8 bits = 1 character

Units of measurement:

bit: the smallest unit of data

byte= 8 bits

Kilobytes=1,024 (B)

Megabyte (Mb)= 1,024 (KB)

Gigabyte (Gb)= 1,024 (MB)

Terabyte= 1,024 (GB)

Types of Units of Storage

Bit
Byte
Kilobyte
Megabyte
Gigabyte
Terabyte
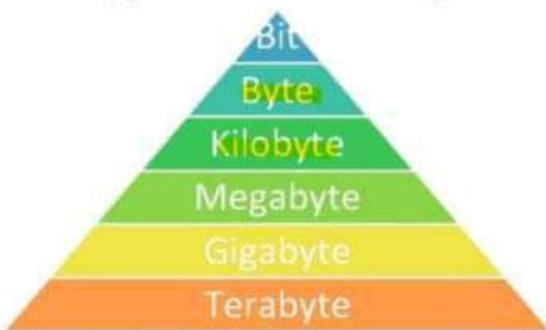

Mbps:

Megabits per second; measures the speed of a network or internet connection (the faster the speed, the better)

GHz (GigaHertz):

Measures the number of cycles your CPU carries out per second; the higher the number, the faster the speed
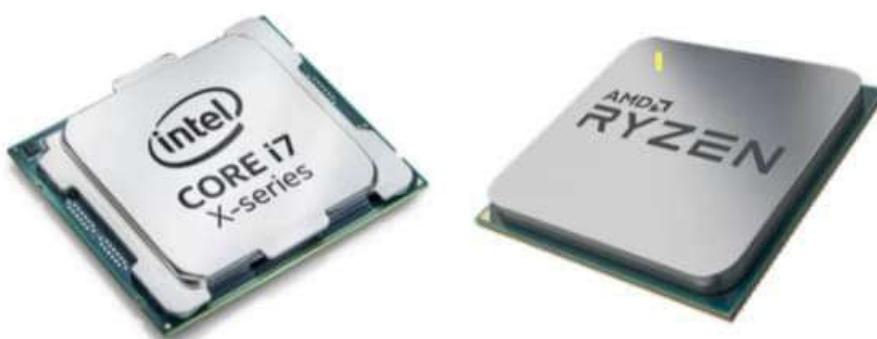

Potential computer problems and solutions:

Problem	Potential reason	solution
1- Trouble processing large files, like a big PowerPoint presentation	Not enough graphics storage	shut down some programs
2- A poor video-conference connection	Slow wireless internet connection	try an ethernet connection
3- Not able to store files	Not enough space	move old files to an external drive
4- Home internet connection not working	connection interrupted	use ethernet or contact ISP

Exercise 2:

Complete: -

1-Some of the computer accessories are.. Ethernet port , Flash memory and. External hard drive

2- Ethernet cable . is a cable that connects a **computer** or **laptop** to a router.

3-. HDMI is a cable that transmits audio and video from\to devices.

4-. router is a **device** that connects a computer to the internet via Wi-Fi or Ethernet.

5-. bit , byte , K.b , M.b ,.. G.b ..and. T.b are some of the computer's units of measurement.

Engage

What does the word network mean to you?
How many networks, digital or otherwise, do you think you have, or you have dealt with?

Networks

They are groups of people, or things, that are connected to each other for a common purpose.

Computer networks connect computers with each other, to share important information and data.

COMPUTER NETWORKS

1- Local Area Network (LAN).

A computer connected to another computer or device such as a printer or router, you may have your own personal computer network at home you have.

Laptop A

Laptop B

USB Modem

Printer

2-A closed network

Such as one in a computer lab, may only have computers linked by cables to allow for file sharing.
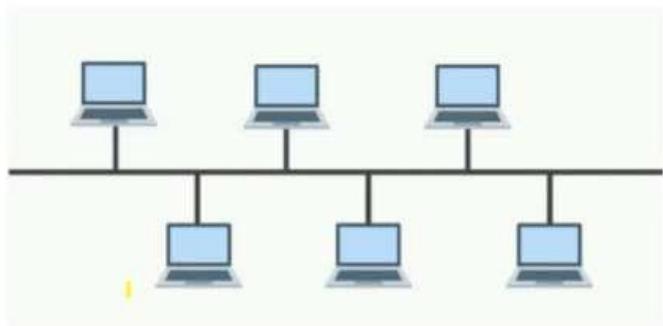

3-The intranet

Unlike the internet, is private, restricted to only those that are part of the business, school, or organization that it is connecting.

INTRANET

ACCESS   COLLABORATION   DATA   COMMUNICATION   PRIVATE NETWORK   INFORMATION

shutterstock.com · 1400185928

4-The internet is a network that connects computers, and the people using them, from all around the world.

What do you need to connect your computer to the internet?

1-A gateway, such as a router.

gateway a means access to something

2-ISP (Internet Service Provider),

such as Egyptian companies to citizens.

we
المصرية للاتصالات

```
                    Networks
